## Work history

### 01/2018- NSI (New System Information)

Till date TCS, Generali

- NSI is a web application for Generali business users or Generali Agents, which is used to generate offers and contracts.
- As a developer, I have been working on enhancement of the application based on CRs and implementation of client needs and designing solutions and along with that, I have worked on different sub products for this application named as Fleet, Motor 2018, NSI Claims, MPC Automatic Rules and Athena as part of different projects..

### 09/2016- Generali Portal

12/2017 TCS, Generali

- Generali Portal is a end user web application for creating insurance offers and contracts of different products.
- As a developer, I have worked on different products over the period as part of this application like Pet Insurance, Building Insurance, Household Insurance, Vechile Insurance and Prisma products.
